Review Questions

```
1. What is the output produced by the following code?
d = {'a' : 0, 'b': 1, 'c' : 2}
print(d['c'])
(a) c
(b) 2
(c) 'c': 2
(d) This code produces an error.
2. What is the output produced by the following code?
d = {'a' : 0, 'b': 1, 'c' : 2}
print(d[2])
(a) c
(b) 2
(c) 'c': 2
(d) This code produces an error.
3. What is the output produced by the following code?
d = {'a' : 0, 'b': 1, 'c' : 2}
print(d.get(2, 'c'))
(a) c
(b) 2
(c) 'c': 2
(d) This code produces an error.
4. What is the output produced by the following code?
d = {'a' : 0, 'b': 1, 'c' : 2}
for x in sorted(d):
        print(d[x], end=" ")
(a) a b c
(b) 0 1 2
(c) ('a', 0) ('b', 1) ('c', 2)
(d) This code produces an error.
5. What is the output produced by the following code?
d = {'a' : 0, 'b': 1, 'c' : 2}
for x in sorted(d.values()):
print(x, end=" ")
(a) a b c
(b) 0 1 2
(c) ('a', 0) ('b', 1) ('c', 2)
(d) This code produces an error.
```

```
6. What is the output produced by the following code?
d = {'a' : 0, 'b': 1, 'c' : 2}
for x in sorted(d.items()):
       print(x, end=" ")
(a) a b c
(b) 0 1 2
(c) ('a', 0) ('b', 1) ('c', 2)
(d) This code produces an error.
7. What is the output produced by the following code?
d = {'a' : 0, 'b': 1, 'c' : 2}
for x in sorted(d.keys()):
       print(x, end=" ")
(a) a b c
(b) 0 1 2
(c) ('a', 0) ('b', 1) ('c', 2)
(d) This code produces an error.
8. What is the output produced by the following code?
pres = {'george' : 'washington', 'thomas' : 'jefferson','john' : 'adams'}
print(pres.get('washington', 'dc'))
(a) george
(b) washington
(c) dc
(d) This code produces an error.
9. What is the output produced by the following code?
pres = {'george' : 'washington', 'thomas' : 'jefferson','john' : 'adams'}
for p in sorted(pres):
        print(p, end=" ")
(a) george thomas john
(b) george john thomas
(c) washington jefferson adams
(d) adams jefferson washington
(e) None of the above.
